(185)

Ex-4:- ICL small → tpfsu then bigger → ?

Ans:- s m a ll → 19-13-1-12-12 +9.
+1 +3 +5 +7
t p f s u → 20-16-6-19-21

logic is addition of odd numbers to actual positions.

b i g g e r → 2-9-7-7-5-18
+1 +3 +5 +7 +9 +11 +1 +3 +5 +7 +9 +11.
c l l n n c. → 3-12-12-14-14-29 (29-26=3)
↓
3

Ex:5:- ICL summer → tspigl then winter → ?

19-21-13-13-5-18
S u m m e r. =>
+1 -2 +3 -4 +5 -6
20-19-16-9-10-12.
t s p i g l.

w i n t e r
23-9-14-20-5-18
+1 -2 +3 -4 +5 -6
24-7-17-16-10 12

Answer → x g q p g l

Ex:-6:- ICL CAT is coded as 24 then mouse → ?

3+1+20
C A T → 24 [sum of actual positions]

Ans:- mouse → [13+15+21+19+5 = 73] → 73

Ex:-7:- ICL blow is coded as 25-15-12-4 then how horn is coded?

Ans:- b l o w.
A.P => 2-12-15-23
R.P => 25-15-12-4
27-27-27-27 → sum is 27 means reverse positions

Ans:- h o r n.
↓ ↓
(27-8) (27-15) (27-18) (27-14)
= 19-12-9-13

Ex:-8:- ICL school is coded as 432 then class → ?

Ans:- when word given with a single number then mostly positions (actual / Reverse) sum / multiplication / sum & x / x & sum - - - - etc.

(186)

Ans:- S-C-h-O-O-l.

19-3-8-15-15-12 → Sum = 72 ≠ 432 [

Sum x no. of letters (or) Sum × 6 = 72×6 = 432 $\left[\frac{432}{72} = 6\right]$

⇒ ∴ C-l-a-s-s ⇒ 3+12+1+19+19 ⇒ 54.

(i) Ans:- 54×6 [x with constant 6] = 324

(ii) Ans:- 54×5 [no. of letters] = 270.

Ex:-9:- ICL Orange is coded blue, blue is coded red, red is coded green, green is coded yellow, yellow is coded mango, mango is coded apple, apple is coded banana then.

(i). Maaza made from?

Ans:- actually 'mango' but according to above codings mango is coded as 'apple'

So, answer apple.

(ii) What is color of sky? Ans:- red [blue → red].

Ex-10:- ICL 'Gangster' is coded as 512, 'smoking' is coded as 343 & 'Mask' is coded as 64, then how 'understanding' is coded?

Ans:- Gangster → 512 $\left.\begin{matrix} \\ \\ \end{matrix}\right\}$ $8^3 \rightarrow 7^3$ all are looks like for the logic of (no. of letters)^3

Smoking → 343

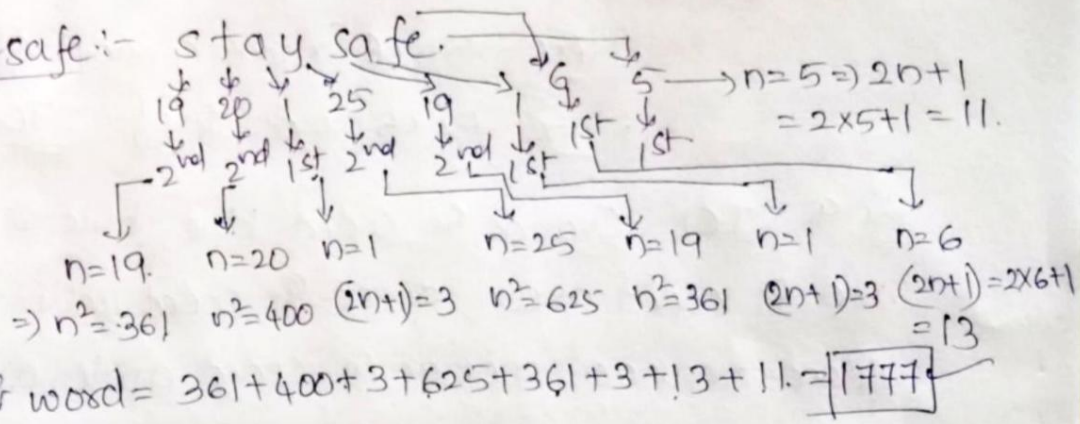

Mask → 64. → 4^3

Understanding ⇒ $(13)^3$ = 2197

13 letters

Ex:-11:- ICL nth letter is coded as (2n+1) when n is an 1st half & nth letter is coded as n^2, when n is an 2nd half then the values of following words? [value = sum of values of individual letters of the word].

i) staysafe:-

Value of word = 361+400+3+625+361+3+13+11 = 1777

Ex:-12:- ICL RIPPLE is coded as 613382 & LIFE is 8192. How PILLER is coded?

Ans:- R I P P L E L I F E
6 1 3 3 8 2 8 1 9 2

here in this coding directly letters are coded with particular numbers like R→6, I→1, P→3, L→8, E→2, F→9. ⇒ ∴ P I L L E R
3 1 8 8 2 6

Ex:-13:- ICL 'nee tim see' → 'how are you', 'ble nee see' → 'where are you', what is code for 'where'?

Ans:- By using cancellation of common terms method.

~~nee~~ ~~tim~~ ~~see~~ → how ~~are~~ you

ble ~~nee~~ ~~see~~ → where ~~are~~ you

∴ where → ble & how → tim
