Ex:-24:- 1, 11, 12, 1121, 122111, 112213, ?

Ans:- Here the logic is reversed :- which digit No. of times

1 → one is for once → 11 → one is for twice → 12 -

- - - - 112213 → one is twice two is twice one is once

three is once ⇒ 12221131

Ex:-25:- 31, 28, 31, 30, 31, 30, 31, 31, 30, ?

Ans:- No. of days in months of non-leap year

∴ till 9th month (Sep) over ⇒ 10th month days = 31 [oct]

Ex:-26:- 31, 29, 31, 30, 31, 30, 31, ?

∴ No. of days in months of leap year.

Ans:- days in August = 31

Ex:-27:- J, F, M, A, M, J, J, A, S, O, N, ?

Ans:- Starting letters of spellings of months Ans is December = D

Ex:-28:- O, T, T, F, F, S, S, E, N, ?

Ans:- starting letters of spellings of Natural No.s.

Ans is starting letter of Ten ⇒ T

Ex:-29:- 10, 40, 90, 61, 52, 63, 94, 46, 18, ?

Ans:- Reverse of squares of Natural Numbers.

$01^2 = 01$ ⇒ Rev = 10, $02^2 = 04$ ⇒ Rev = 40 - - - -

- - - - $9^2 = 81$ ⇒ Rev = 18

Answer is reverse of $10^2 = 100$ ⇒ Rev = 001 = 1

Ex:-30:- 10, 80, 72, 46, 521, 612, ?

Reverse of cubes ⇒ Ans is reverse of $7^3 = 343$

Rev = 343

(197)

Ex:-31:- 13, 31, 17, 28, 21, 97, 27, 44, 33, 75, ?

Ans:- here if you think for more & more time also some times you may not get the answer. [Practice must]

if:- you know cubes then only you can able to do this question.

Logic:- Cubes from 11 but 2 digits as one observation

13,31	17,28	21,97	27,44	33,75	40,96
11^3	12^3	13^3	14^3	15^3	16^3

Answer is 40

Ex-32:- 23, 57, 11[illegible], 17|9, 2329, 3137, ?

Ans:- two prime numbers considered as one observation from 1st prime.

Answer is:- | 2|3 | 5|7 | 11|13 | 17|19 | 23|29 | 31|37 | 41|43 |

Answer is 4143
