(207) according to given conditions:-

$x-(4+4+4)=\frac{x}{3}$

$x-12=\frac{x}{3} \Rightarrow x-\frac{x}{3}=12 \Rightarrow \frac{2x}{3}=12$

$\Rightarrow \boxed{x=\frac{36}{2}=18}$

(11) A certain street has 1000 buildings. A sign-maker was contracted to number the houses from 1 to 1000. How many zeroes will he need?

Ans:- No. of zeroes till 99 from 1 $\Rightarrow$ 10, 20, 30 ... 90 $\Rightarrow$ 9 zeroes

100 to 199 $\Rightarrow$ 100 $\rightarrow$ 2 zeroes, 101, 102, ... 109 $\rightarrow$ 9 zeroes, 110, 120, 130, 140 ... 190 $\rightarrow$ 9 zeroes $\Rightarrow$ Total = 9+9+2 = 20.

Same way zeroes from 100-999 = 9 x 20 = 180 zeroes

Zeroes in 1000 $\longrightarrow$ 3.

Total zeroes = from 1-99 [9] + from 100-999 [180] + in 1000 [3] = 9+180+3 = $\boxed{192}$
