THEORY EXAM PROCEDURE & RULES:

1) All of you loginto **labexam** user.

Username is **labexam**, password is **123**

2) After login check it keyboard, mouse and LAN everthing is working fine or not. If any system is having problem, you can take support from anyone of our coordinator. Still if it is not working, better you can move to other system before exam is started.

3) Open the **Mozila Firefox** browser and type

https://192.168.2.2:7071/onlinetest url in address bar.

Note: For demo test and improvement exams use

https://192.168.2.2:7071/oldonlinetest

5) Collect the rough sheets before 5 minites of the exam form coordinator.

6) All of you write your ID and name on the rough sheet top side right corner. After exam, submit the rough sheet with out fail.

7) Dont write questions and answers on the rough sheet. Use only for rough work. If you dont follow this rulewill be assigne ZERO maks.

8) After exam started dont see the other monitors (Even eyes movement also not allowed). You have to write the exam seriously and sincerely.

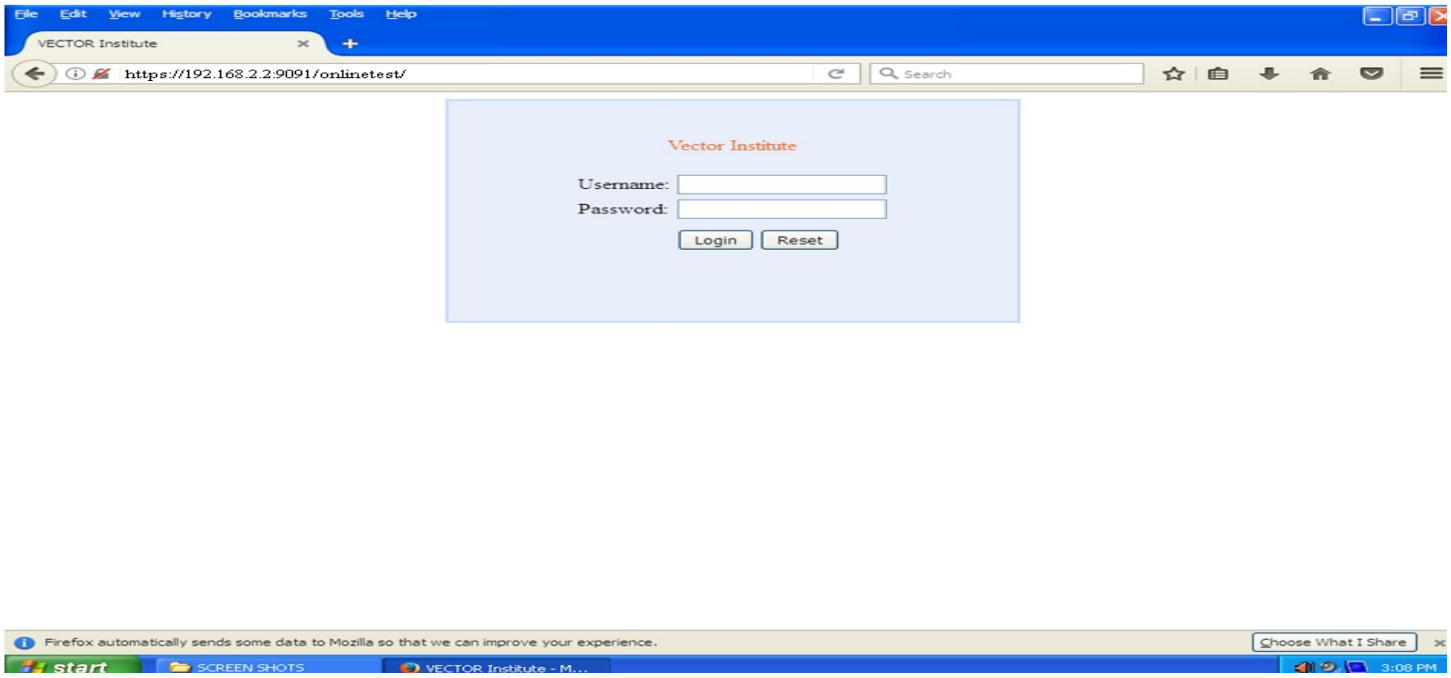

9) All of you put your mobiles and ID card on the table right side of you. And check it once whether your mobile is in slient mode or not. Dont access the mobile during the exam time.

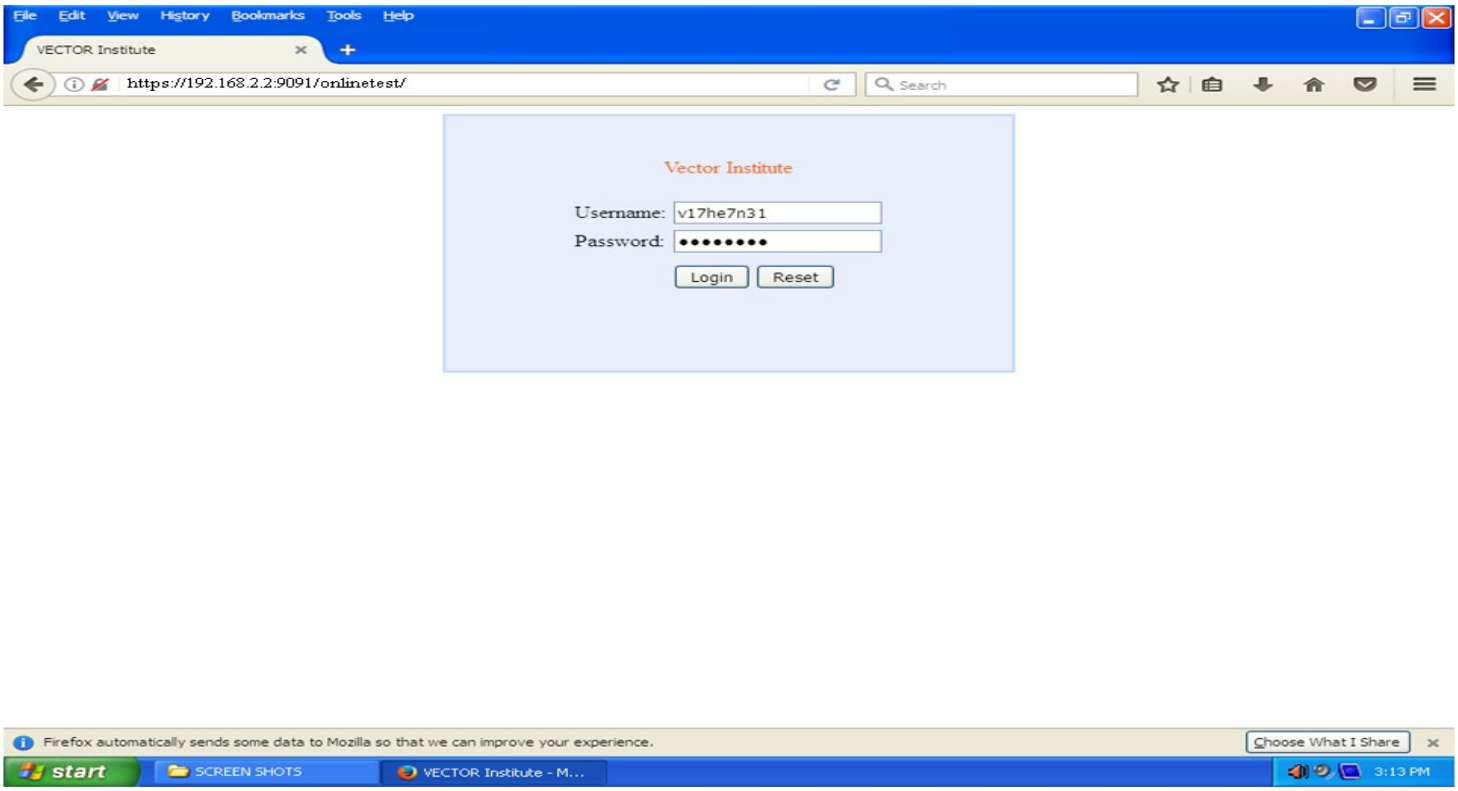

10) If any stdent is trying to do mal-practice, on the spot we will send out by putting zero marks. Then no more discussions.

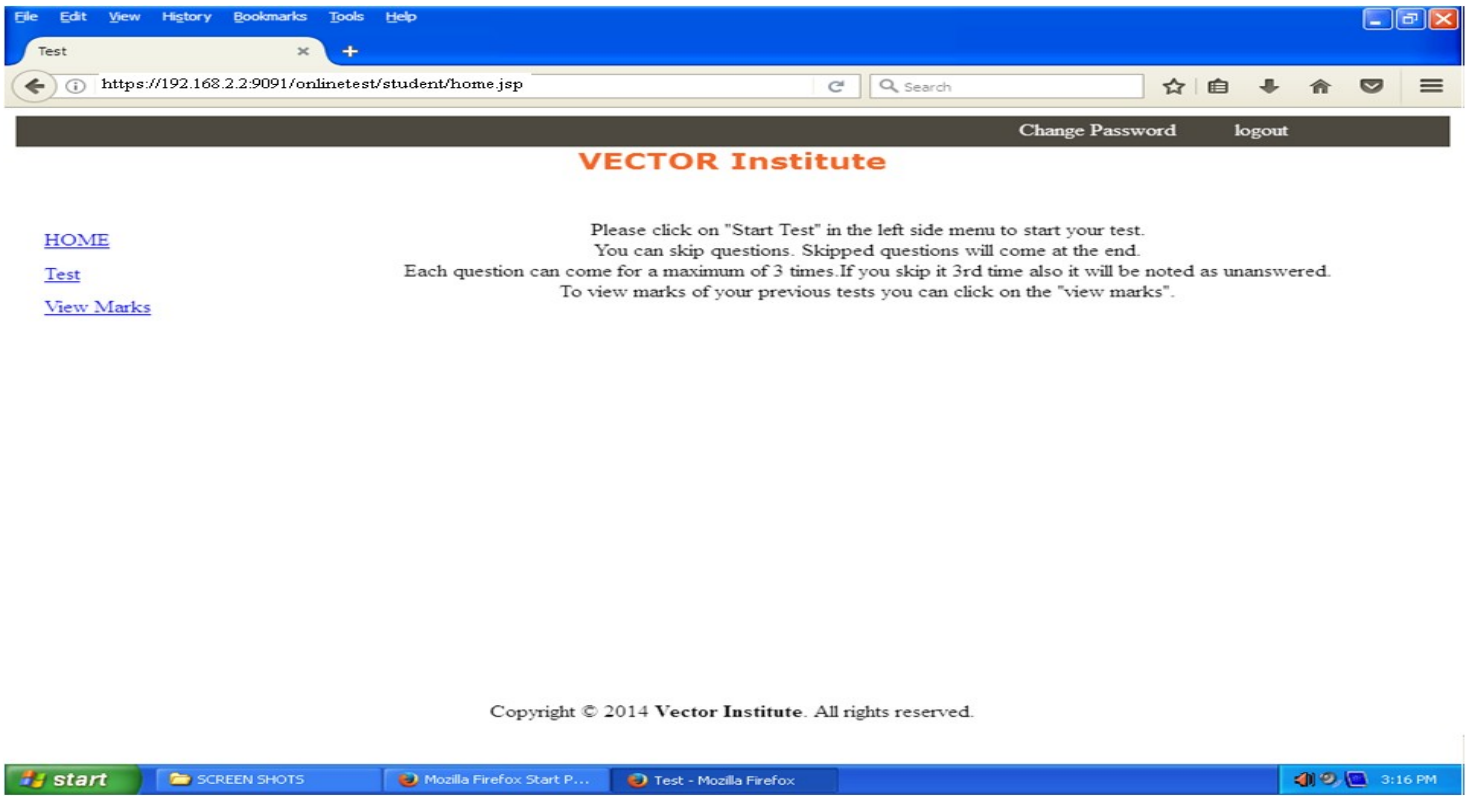

11) After exam, you have to logout from your account and shut down the system.

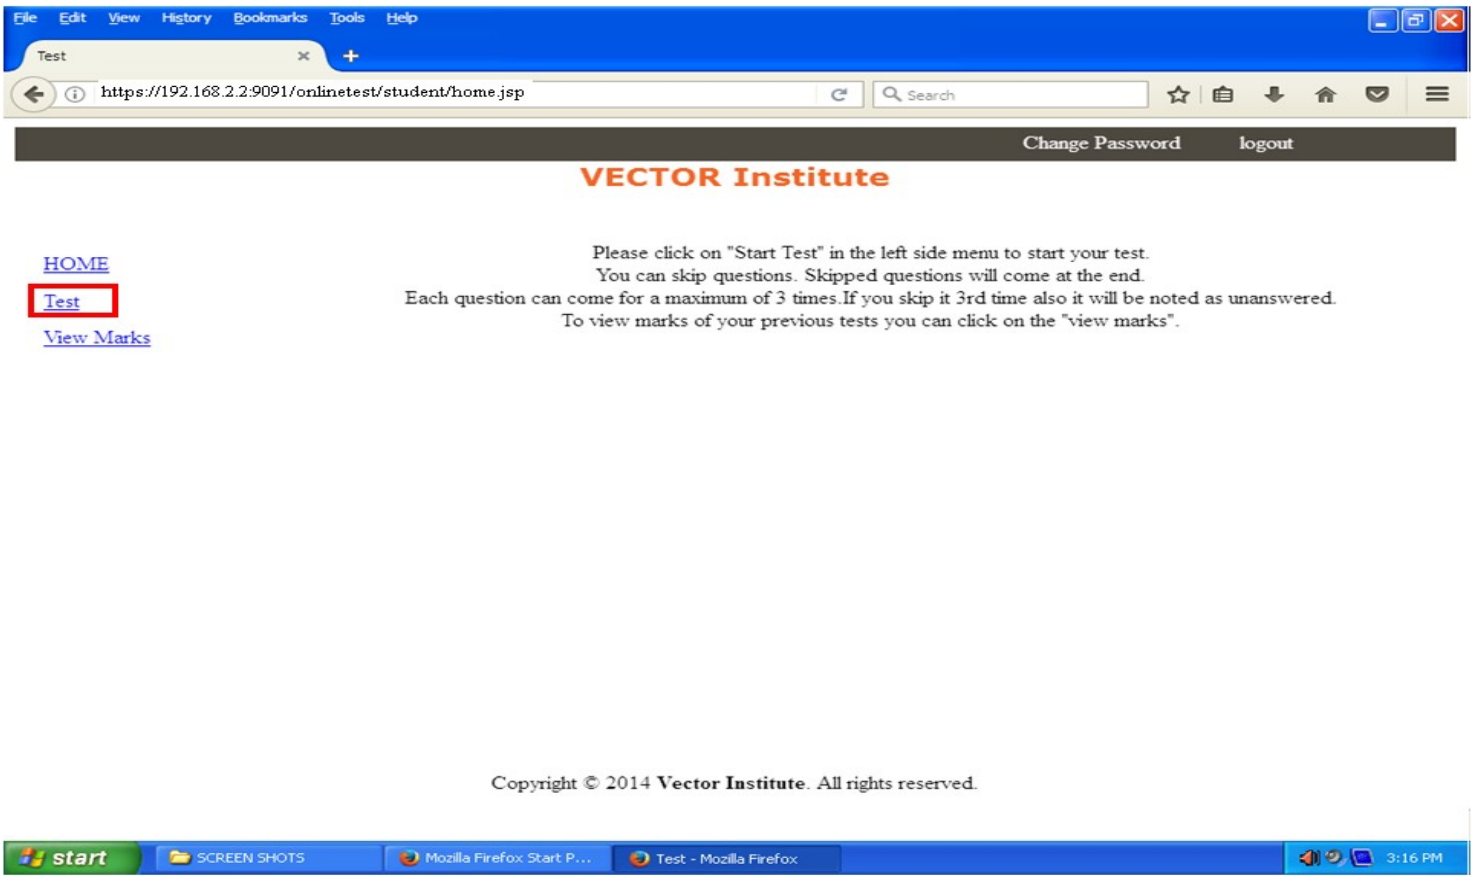

12) Last but not least, after login please read the instructions availble on home page without fail.

FOR LAB EXAM PROCEDURE AND RULES

LAB EXAM PROCEDURE AND RULES:

1) First switch **ON** the systen in ubuntu os and login to your account once. Check it keyboard, mouse and lan everthing is working fine or not. If any system is having problem you can take support from any of the coordinator/exam incharge. Still it is not sloved, better you can move to other system before exam is started.

2) once first step is succuss then logout and wait for the question paper.

3) All of you put your mobiles and ID card on the table right side of you. And check it once whether your mobile is in slient mode or not. Dont access the mobile during the exam time.

4) After exam is started dont see the other monitors (Even eyes movement also not allowed). You have to write the exam seriously and sincerely.

5) If any stdent is trying to do mall practice, on the spot we will send out by putting zero marks.

6) After question paper is given, first you have to write your ID and name on the question paper with out fail.

7) Then check the login crendentials which are available on your question paper (top side right corner). login to labexam ID what it is provided on your question paper. Dont login to wrong lab exam ID.

8) After exam is over, everybody has to submit the question paper without fail. If any student is not submitted the question paper, marks are updated as zero even your program is correct.

9) In lab exam, attendance will take. So if any student exam is over before given the attendance, it is student responsibility to give the attendance before submitting the question paper.

10) If any student want to do the rough work, question paper back side you can use it. But dont write the program on question paper back side. You have to use for only rough work.

11) After login, type **ls** command to check the list of files avaiable in that user. You have to use only those files to write the program. Inside file you have to fill your details (student id and name) without fail.

12) During the exam, if any support is required you have to ask coordinator/exam incharge. Don't take any support from your friends.

For your reference:

Details given on your question paper

Set : A or B
Login ID: labexam1 … labexam2 ….. Labexam100 and so on
Password: 123
Date : dd.mm.yyyy
Test : CWL1

Type ls command then you will get below list of files.

SET A : 1a.C 1b.C
SET B: 2a.C 2b.C

ASSESSMENTS

Assessment are conducted for C-1 , C & ARM modules.
C-1 Assessment
C-Final Assessment
ARM-Final Assessment

Process:
First will conduct the written test (pen & paper test) then after will give the assessment interview schedule.

(OR)

Direcly will give the interview assessment schedule and will be focused on VPL and QUIZ.

ELIGIBLITY FOR CAMPUS

Student required to score minimun 40% (overall module %) in internal exams and C Assessment Recommendation to eligible for placement.

Note: In some situations, based on the company requirement ARM Assessment Recommendation also required.

If any stdent got score <40% in internal exams and Not recommended in assessments?

IMPROVEMENT EXAMS If any student got overall module exam score less than 40% in internals, IMPROVEMENT exams will be conducted to improve the score.

Note: These improvement exams are not for only <40% score students, applicable for all students (who are intrested). But these exams are not manditory to attned.

ONE improvement exam will be conducted for each module.

Improvement 1 (IMP1)

MODULE	**EXAM ID**									
C	**WT1**	**WL1**	**WT2**	**WL2**	**MT**	**ML**	MT-IMP1	ML-IMP1		
ARM	**WT1**	**WL1**	_____	_____	**MT**	**ML**	MT-IMP1	ML-IMP1		
CPP	**WT1**	**WL1**	_____	_____	**MT**	**ML**	MT-IMP1	ML-IMP1		
UNIX	**WT1**	_____	_____	_____	**MT**	**ML**	MT-IMP1	ML-IMP1		
TCP/IP	_____	_____	_____	_____	**MT**	**ML**	MT-IMP1	ML-IMP1		

Note: For improvement exams, module total syllabus will include.

For more details check the FAQ given below

FREQUENTLY ASKED QUESTIONS

Q1. Is there any Negative marking in exams?

Ans: No

Q2. What is the reporting time for exam?

Ans: It is good that you are 15 minutes before exam, least case you have to be atleast 5 minutes before exam.

Q3. How can i get the support if any practical problems?

Ans: In order to avoid the practical problems, Before writing any exam please check the following things properly.

Check whether system is properly working or not, Check systen LAN connection, Check your login credentials, Check exam URL accessing or not in that speciifc system.

Before exam time, If any issue please take support from coordinator or exam incharge.

Q4. What happen if student came to the exam after exam started?

Ans: No extra time is given to you, you have to complete exam with in the time mentioned. Once exam started from server side then timer will start counting. If you are coming late you have to use available time (remaining time) to complete the exam.

Q5. What happen if any student tries mal-practice during the exam time?

Ans: Zero marks are allocated in exam, no further discussions and arguments.

Q6. In Lab exam, what happen if studnet do not submit question paper after exam?

Ans: Due to any reason, if student does not submit the question paper after exam, then “0” marks will be updated no matter how well he writes exam. So, without fail submit your question paper.

Q7. If I’m absent to exam, then what to do?

Ans: Please follow procedure below.

Login to your vector account (vector login)

Select support (available on, left to the main page)

Select examination

Select module name

Select exam name

Comments (write your reason why are you absent? And request to write exam with other batch. If possible mention the batch name also)

Send request

Note: For each test you have to send one request

For example, if you are absent for C weekly 2 exam then you have to send seperate request for CWT2 and CWL2.

Q8. How improvement exam marks are updated?

Ans: Please check the below examples for better understanding ...

CWT1	CWT2	CMT	CMT-IMP1
27	40	18	28

In the above example, your IMP1 marks are replaced in CMT

CWT1	CWT2	CMT	CMT-IMP2
27	40	28	38

In the above example, your IMP1 marks are replaced in CWT1

CWT1	CWT2	CMT	CMT-IMP2
27	40	28	21

As you got less marks in improvement here, no replacement of marks.

Q9. Is there any seperate process for working students?

Ans: Please meet exam incharge to know procedure of exams...

* ALL THE BEST *
