Few Features of C

- High level Programming
- Data Oriented, Procedural
- Block structured

Block Structured (Functions, conditions, Branch, loops)

A C-prog must contain function.

Syntax :

```
ret_type fun_name(Argument Declaration)
{
    ==          Body
}
```

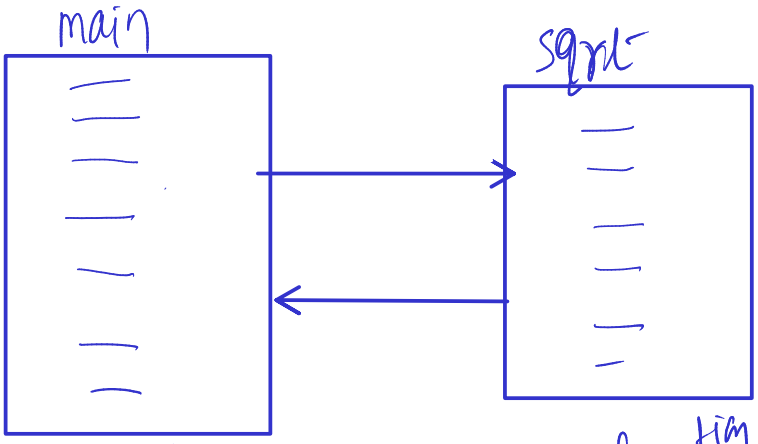

Definition

```
ret_type fun_name(Arg type);
```

Declaration / prototype

double sqrt(double);

↑ Declaration / prototype

calling function

called function

Function (3 Parts)
- Declaration / Prototype
- Defn / Body
- call / Jump

~~int printf(const char*, ...);~~

main() {

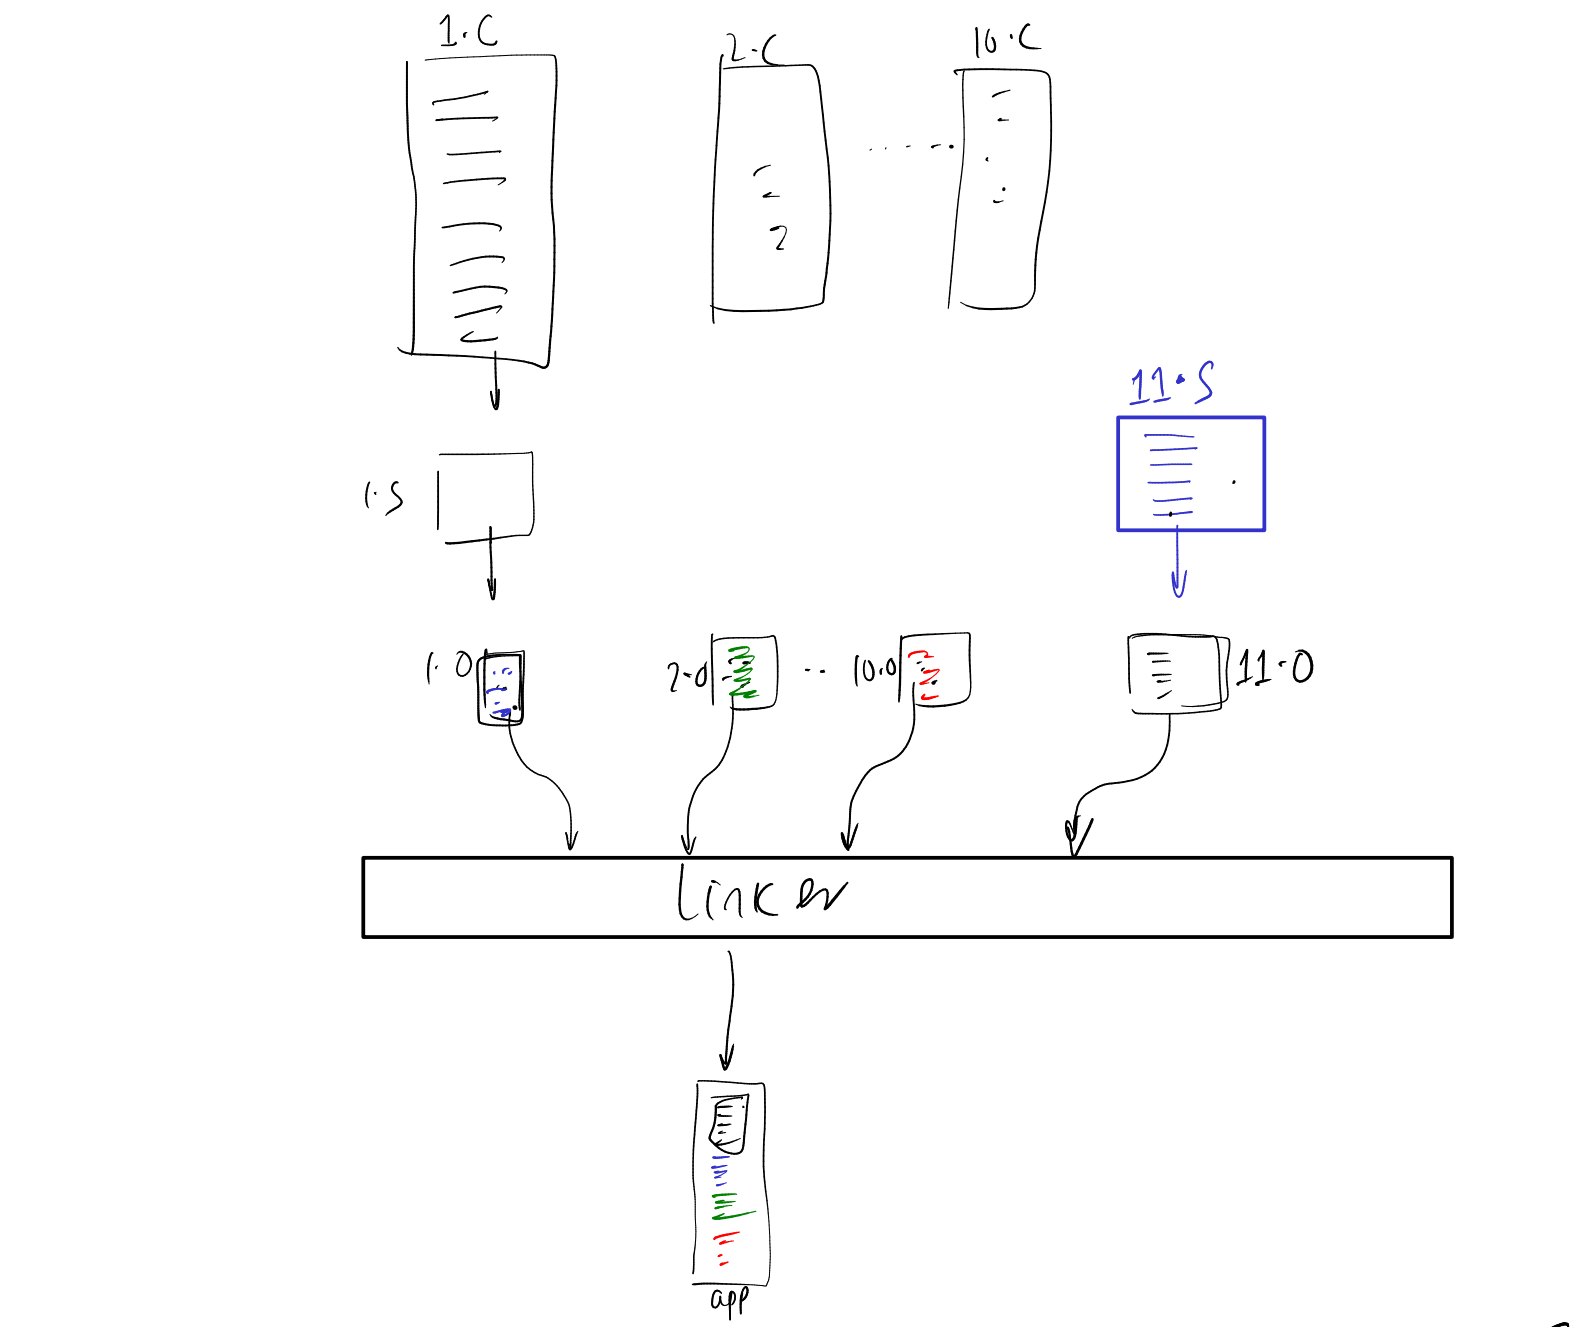

Printf("Hello");

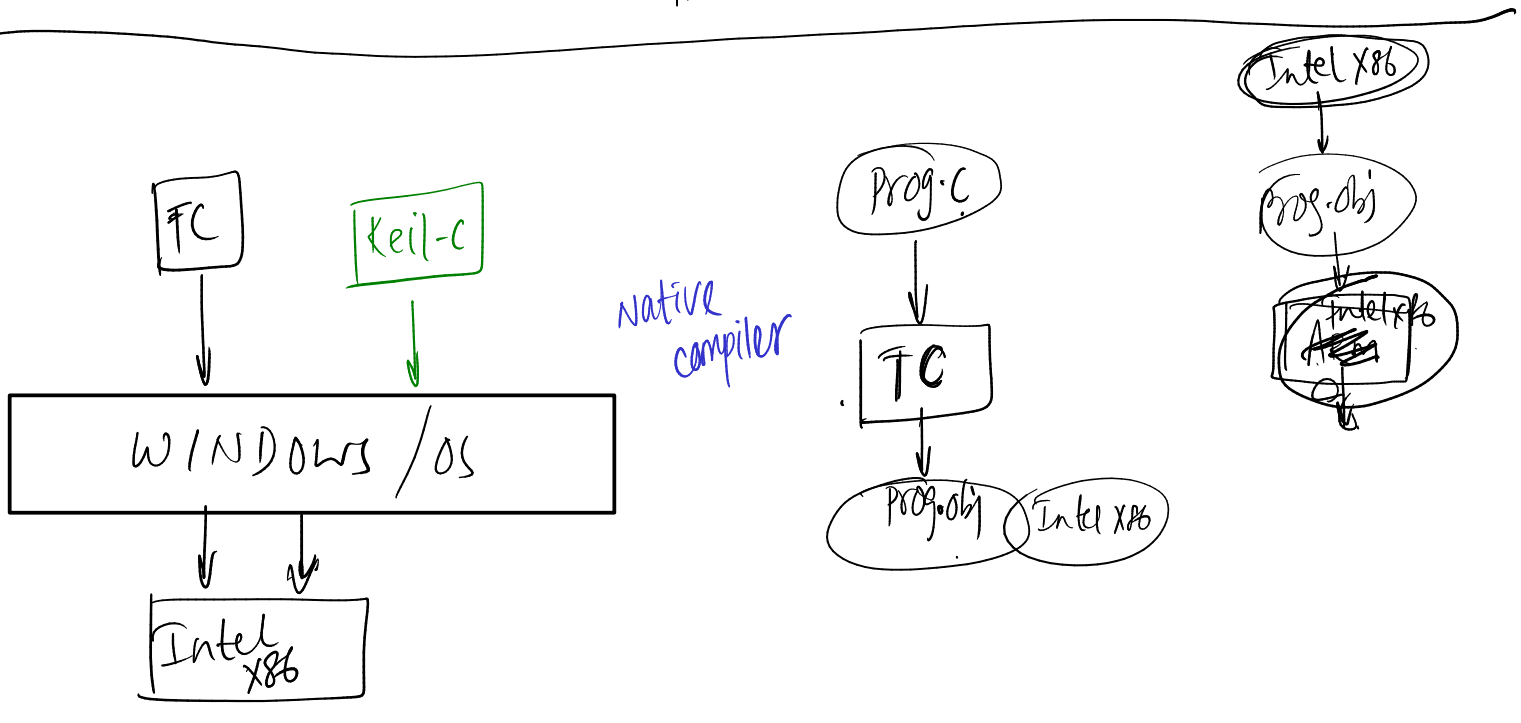

}

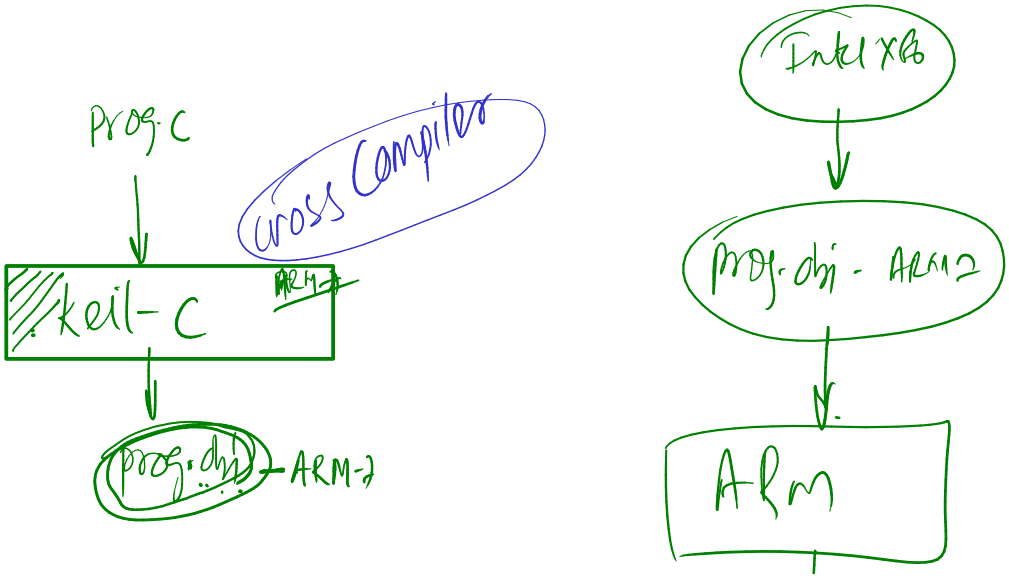

function call

Defn

Errors
- Compile time
  - Preprocessing
  - Translation / Syntax Errors
  - Assembling
  - Linking
- Runtime / Bug
