switch case

→ readable / simple look

→ faster in execution / Runtime - time efficient

```
if( - ) {
        }
else if( ) {
        }
else if( ) {
        }
else {
        }
```

W.A.P. to check the supplied integer is a Prime Number or not.

I/P	O/P
23	Prime
35	Not-Prime

what's a prime number?
→ Number, completely divisible by 1 and itself. only.

data => 23
