gets(str);

while (*str == ' ') {

memmove(str, str+1, strlen(str+1)+1);

}

Removes All spaces at the Beginning

str => " ab cd"

str => " ␣␣␣ab␣cd␣"

␣␣ab␣cd␣10

ab␣cd␣10

while(str[strlen(str)-1] == 32)

str[strlen(str)-1] = 0;

Removes all ␣s at the end

str => "ab␣cd"

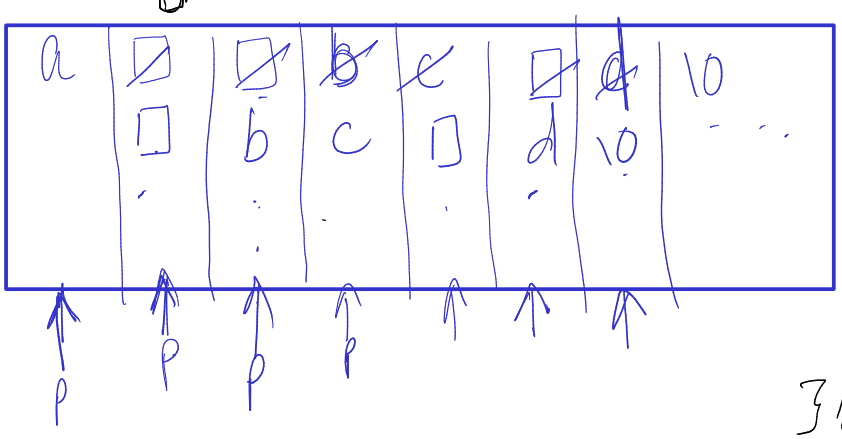

str => "ab␣cd␣␣␣"

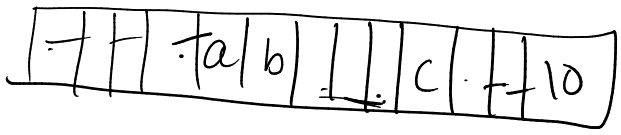

removeSpacesAtStart(str);

removeSpaceAtEnd(str);

removeExtraSpaces(str);

removeExtraSpaces(char *p)

{

while(*p)

{

if(*p == ' ')

if(*(p+1) == ' ')

{

mm(p, p+1, strlen(p+1)+1); p--;

}

++p;

}//while

}//function

W.A.P to Insert a '*' in the mid of a string

str => "abcd" => "ab*cd"

str => "abc" => "a*bc"

str => "ab" => "a*b"

str => "a" => "a"

```
gets(str);
char *p;
p = str + strlen(str)/2;
if(p != str){
mm(p+1, p, strlen(p)+1);
*p = '*';
}
```

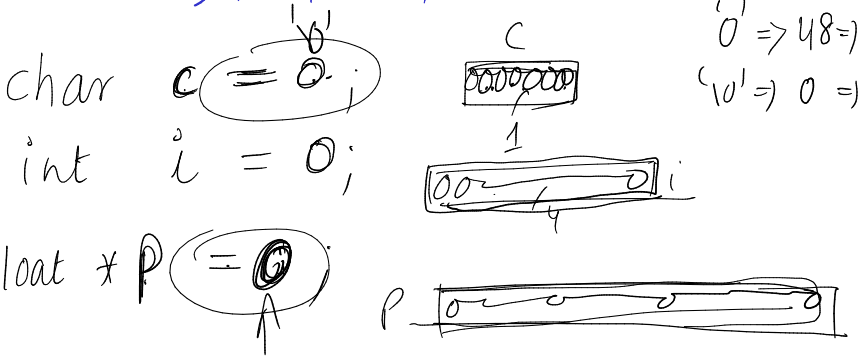

```
char *strchr ( const char *str, int ch );
```

searches a character ch in the string str.

If found, then returns the location where it found.

If not found then returns NULL.

(void*)0

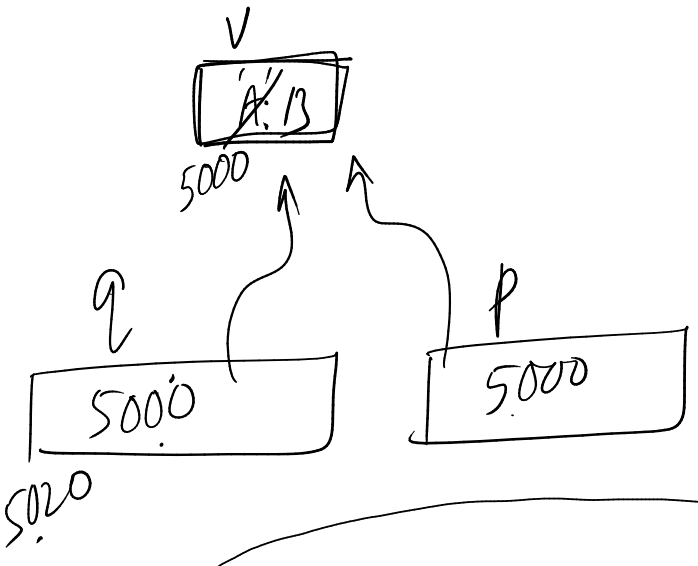

(void*)0 / NULL

```
ch = getchar();
int getchar(void);
```

```
char v = 'A';
char *p;

const char *q;

p = q = &v;
```

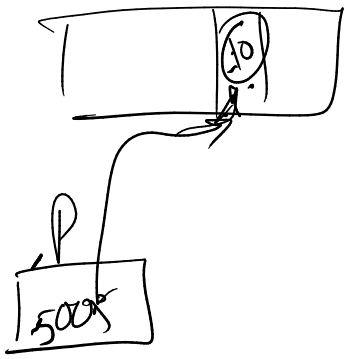

```
++*p;
Pf("%c", v); // B
++*q; // Error, Syntax Error
Pf("%c", v);
```

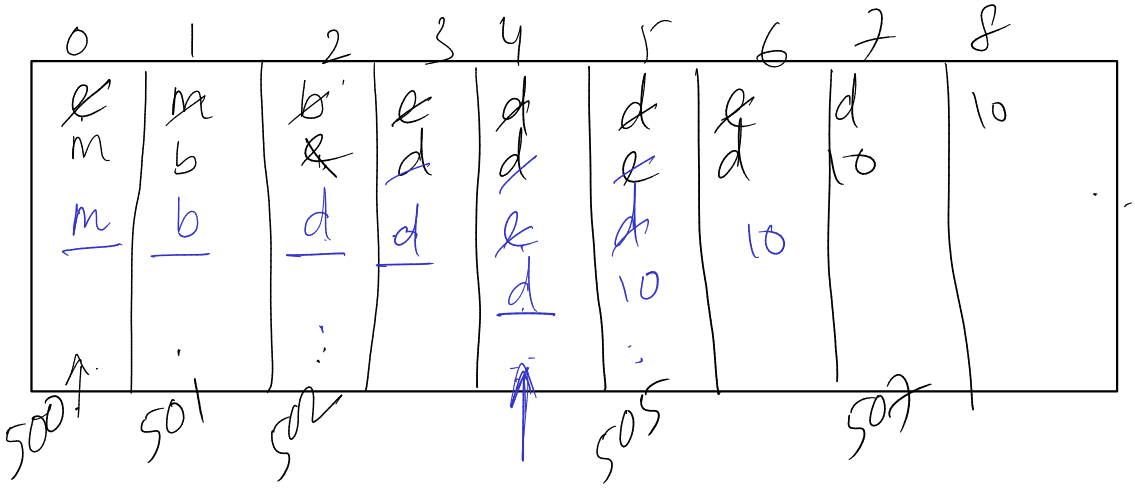

Declaration of strcpy, strlen, atoi

```
int atoi(const char *);
unsigned int
size_t strlen(const char *);
char *strcpy(char *, const char *);
```

```
char *myStrchr(const char *p, char ch)
{
    while(*p){
        if(*p == ch)
            return p;
        ++p;
    }
    return NULL;
}
```

Str => "embedded" ch => 'e'

p	p = strchr(p, 'e')
500	500
500	502 = strchr(500, 'e')
502	504 = strchr(502, 'e')
504	0 = —(504, 'e')
p = NULL	

MUST TRY Assignment-

1) Remove all extra occurrences of chars in a string

str => "VECTOR" => "VECTOR"

str => "embedded" => "embd"

2) Add ~~extra~~ the same character, where ever found in a string

I/P	O/P
Str: INDIA	IINDIIA
ch : I	
"embedded"	"eembeeddeed"
'e'	

3) verify the supplied string is a palindrome or not.

I/P	O/P
"ABCD"	Not a palindrome
"ABCBA"	Palindrome

using two methods

- (i) may use extra Array
- (ii) without using additional Array.

strstr, strtok, strcmp,
