# Strtok

p = Strtok(S, " ")

char *p

```
while(p)
{
    printf("%s", p);
    p = Strtok(NULL, " ");
}
```

i/p: This is vector
o/p *hi* ** *ector*

```
for(i=0; s[i]; i++)
    if(s[i] == ' ')
    {
        s[i+1] = '*';
        s[i-1] = '*';
    }
```

Using of remove

Replacing a String with other String

i/p: This is hyd vector

Substring: hyd

replacing: hyderabad

o/p: This is hyderabad vector

i/p This is hyderabad vector

S: hyderabad

r: hyd

o/p This is hyd vector

i/p This is hyd vector

S: hyd

r: Blr

o/p This is Blr vector
