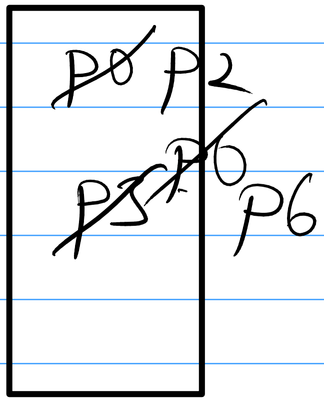
Page replacement algo:-

VM :- page fault, trap
Swap in / swap out
MMU
page table
PCB

Dirty page

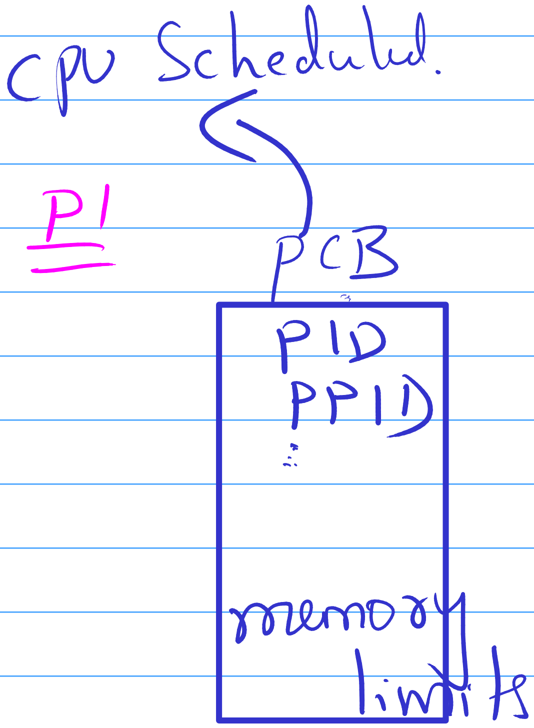
VM ≠ Page

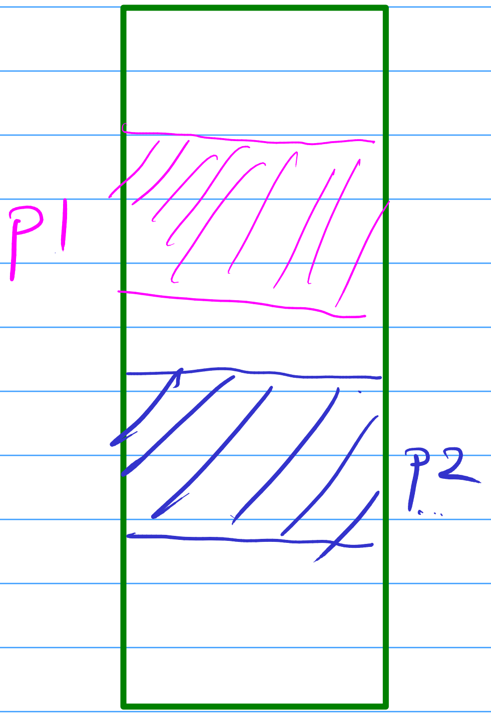


execve system call

To Replace the process

P1





pwd

vi

ls

ps

$ ls

$ ls -l

PATH

$PATH

$ ls

$ ./a.out <u>arg1</u> <u>arg2</u>

(Shell)
BASH — creates a process (fork) → <u>P1</u>

<u>P1</u>
↓ exec Variant
<u>P2</u> (Command exec)

```
main()
{

    execv(      );

}
```

compiled got the <u>exe</u>

<u>P1</u>

. program1 program2

exe1 exe2

To replace with
exe2
