FAQs - OS

1. why OS? (or) List the OS services?
2. why Linux over other OS?
3. what is embedded OS & RTOS OS. List some examples with the requirements?
4. kernel space Vs user space
5. process Vs Threads
6. what is PCB and what it contains?
   - where it is maintained.
7. what is TCB and what it contains?
   - where it is maintained.
8. what is multi processing?
9. Define following terms
   a) program b) file c) process d) thread
   e) PM f) FM g) MM h) IPC
   i) pipe / fifo / msg queue / shared Memory
   j) inode k) page table l) Virtual memory
   m) page fault n) Demand paging
   o) swap in p) swap out q) dirty page

r) process Synchronization s) mutex

t) Semaphore

10) Pipe Vs fifo

11) Pipe Vs message Queue

12) Pipe Vs Shared Memory

13) what is Context Switching & why threads are called as light weighted process?

14) Define following terms related PM.

a) Turnaround time b) Response time

c) Burst time d) throughput e) cpu utilization

15) List cpu Scheduling algo & explain Round Robin Scheduling Algo.

16) List and explain PM related system calls & library functions.

17) List and explain FM related system calls & Library functions.

18) Why copying a big sized file from pc to pendrive takes longer time but copying from one drive to another drive of same system takes less time.

19) Define the following terms
a) zombie process b) Orphan process
c) deamon process d) init process.
e) background process. f) defunct state

20) How to avoid zombie state ?

21) Signal Vs Sigaction?

22) List some commands of Linux and explain ?

23) fork Vs Vfork

24) where the System Calls are getting executed ?

25) why virtual memory ?

26) How free function knows how many bytes to be freed ?

27) If 100 bytes of memory allocated using malloc function and trying to access 150th byte then what happens ? and why ?

28) Explore on below given Commands ?

a) ps b) du c) df d) tar e) exit
f) uname g) chmod i) umask

29) Vi Vs nano vs touch Commands
↳ open a file

30) umask Vs chmod

31) Explain the booting sequence of a desktop computer.
